How to make a press-ready PDF from CANVA

Please note that CANVA is not an industry standard printing application and errors may occur on final print run even if PDF appears correct.

1. Create or open the existing design that you want to print.

2. Add margins and bleed and adjust some elements, if needed.
    Learn more about Margins, rulers, bleed, and crop marks.

3. Select **Share** from the editor menu bar.

4. Select **Download**

5. On the file type dropdown, **select PDF Print.**

6. Optional: If you need crop marks, tick Crop marks and bleed.

7. Optimize your PDF print file, tick **Flatten PDF**.
    Learn more about Downloading designs as flattened PDF

8. Select Download. If you used premium elements, pay for them first.
